General

Playing like the pros - no problem with the innovative and yet so easy to master BÖHM SEMPRA organs and keyboards.

Boehm specialist Claus Riepe has now prepared many registrations from his program for you and summarized them in a fantastic SONG list for the SEMPRA. Among them are settings that Claus has used in his YouTube videos, reaching millions of listeners all over the world on his BÖHM organs. Enjoy on your SEMPRA now yourself the registrations of Claus Riepe, elaborated with loving details and perfectly arranged. This SONG list contains 64 SONGS with 6 single presets each.

Requirements

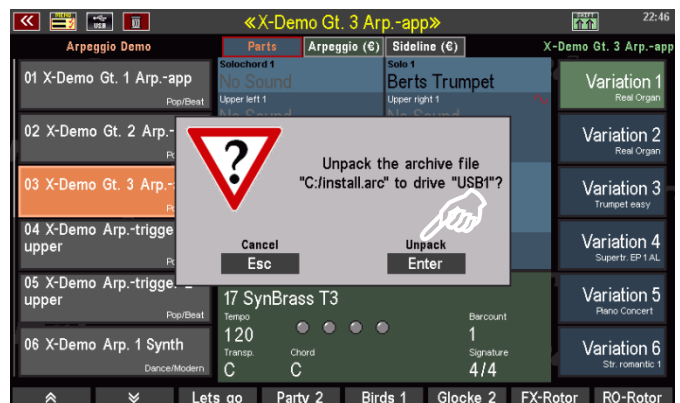

Claus has fully exploited the possibilities of SEMPRA in his registrations. And so also sounds from the Movie Sound Edition and styles from the additional packages Star Collection, ASP, Style Box and Hit Session are used. In addition, the DSP extension for AMADEUS and the "Sound Controller" app. So these extensions should be available to play all presets with all possibilities.

In the appendix to these operating notes Claus Riepe has summarized some playing tips for the registrations.

Installation

You will receive the data of the SONG List SONG Box 1 Claus Riepe as an installation file on the factory data stick belonging to your SEMPRA, or, in the case of subsequent purchase of the software, if necessary as an archive file by e-mail. In this case, save the archive file sent to you on your PC on the factory data stick as described in the main SEMPRA manual.

Then insert the stick into the SEMPRA. The display reports that the archive file has been found and asks whether it should be unpacked. Confirm the query with **[Enter]**.

The installation data is now available on the stick and can be installed as described below. But first a tip: Delete the archive file again from your factory data stick after installing the data. Otherwise, the display will always ask whether the file should be unpacked when you insert the stick into the organ, since archive files are automatically recognized. The unpacking has now already taken place and the archive file can thus be deleted from the stick, it is no longer needed.

But now to the actual installation:

Attention: Like all factory data and other additional software packages, the SONG List SONG Box 1 Claus Riepe is installed on an account-specific basis. If you want to use the SONG list in multiple user accounts, you must perform the installation separately for each of these accounts once.

We assume that the installation data is now on your factory data stick and the stick is inserted in the SEMPRA:

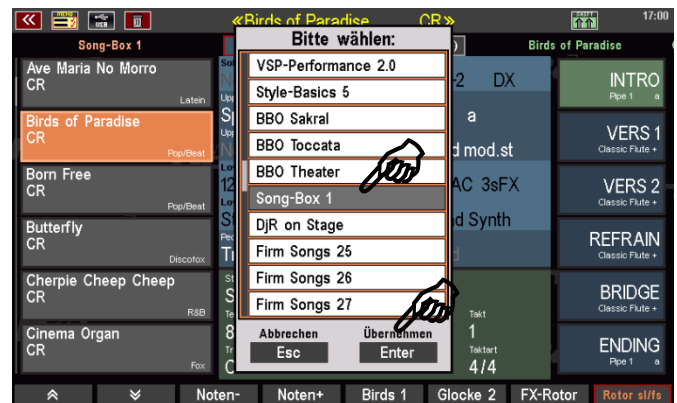

- Enter the USB menu and tap the **Installation** data type on the left. The list with the installation files is displayed.
- Place the cursor on the **59307 SONG Box 1** folder and tap **Load/Install folder** on the right.
- The display asks whether the data should really be installed. Confirm with **[Enter]**.
- The SONG bank will now be installed. Afterwards you can remove the stick again.

This completes the installation of the SONG List **SONG Box 1 Claus Riepe**. The new data can now be used for playing.

Calling up the SONG Liste SONG BOX 1 Claus Riepe

The SONG list occupies the Firm SONG bank 23. It is labeled "**SONG Box 1**" in the bank listing in the display. You can call up and select this SONG bank if you activate the SONG filter button **[Bank]** to the left of the display and (after tapping the button again) select the bank "**Song Box 1**" from the list with the **data wheel** and confirm with **[Enter]**:

After selecting the bank you can select the SONGS of the list in the display:

And now we and of course Claus Riepe wish you a lot of joy with the presets of the SONG list and when making music with it on your SEMPRA!
